

On-Site Cardiac Imaging for Clinical Trials

Remote Interpretations & Rapid Response

CardioRad

Imaging | Prevention | Outreach

Increase uniformity and accuracy for your clinical trials. Identify therapeutic success more effectively. Improve continuity of care. Increase revenue for your practice.

Looking to increase your capacity for clinical trials and generate more revenue? CardioRad offers comprehensive on-site ancillary cardiovascular imaging services, performed to your clinical specifications and in your office(s), along with remote interpretations. Our approach to cardiac imaging not only improves continuity of care and outcomes for your patients and trial participants, it significantly increases your profit.

CardioRad offers world-class imaging cardiologists affiliated with The Cedars-Sinai Heart Institute along with a network of fully certified and registered cardiac echo and nuclear technologists.

Our comprehensive approach to cardiovascular imaging creates uniformity and increases the accuracy of your trials. CardioRad utilizes a team approach that facilitates optimal image acquisition, prompt interpretation, uniformity, and timely reporting of results. Our physicians work hand-in-hand with fully-certified and registered providers of carotid IMT, echocardiography, EMG/nerve conduction, holter monitors, nuclear, stress-echo, and vascular imaging. We also provide assistance with pre-authorizations, coding and reimbursement.

CardioRad provides uniformity of clinical results and eliminates variables that can influence the outcome and efficacy of your trials.

CardioRad guarantees the same imaging cardiologist and cardiac sonographer for the duration of your trials, ensuring uniformity of clinical results. Our examinations are based on consistent criteria; including estimation of ejection fraction, regional wall motion abnormalities, valvular leaks or stenosis, muscle hypertrophy and other disease states.

Featured Client

David B. Agus, MD

- Director, University of Southern California (USC) Norris Westside Cancer Center & Center for Applied Molecular Medicine
- Professor of Medicine, Keck School of Medicine (USC)
- Chair, Global Agenda Council on Genetics for the World Economic Forum
- Co-founder of Applied Proteomics, Navigenics and Oncology.com
- Adjunct Faculty, The Translational Genomics Research Institute (TGen)

Dr. Agus heads USC's Norris Westside Cancer Center and the Center for Applied Molecular Medicine. His research focuses on the application of proteomics and genomics for the study of cancer and the development of new therapeutics for prostate cancer. Dr. Agus's clinical responsibilities include the development of clinical trials for new drugs and treatments for prostate cancer, his groundbreaking work being supported by the National Cancer Institute and other private foundations.

Dr. Dandillaya and his team have been offering on-call imaging services and same-day interpretations of echocardiograms since 2009 for patients participating in prostate cancer clinical trials at USC Norris Westside Cancer Center.
