

On-Site Cardiac Imaging & Remote Interpretations for Donor Heart Procurement

Rapid Response On-Call Weekend & After-Hours Coverage

CardioRad

Imaging | Prevention | Outreach

Increase uniformity and accuracy of cardiac imaging for your donor hearts. Eliminate delayed studies due to a lack of coverage. Minimize delays for the families of the donors. Get your studies read on the weekend.

Optimize suitability for organ transplantation. Increase transplant outcomes.

CardioRad offers world-class imaging cardiologists affiliated with The Cedars-Sinai Heart Institute along with a network of fully-accredited and registered cardiac sonographers.

CardioRad provides 24/7 on-call remote interpretations of pre-procurement echocardiograms to eliminate gaps in coverage and enhance the accuracy and reliability of cardiac imaging for donor hearts.

CardioRad offers second-opinion tele-echocardiography as well as weekend and after-hours rapid response on-site cardiac imaging through our network of fully-accredited and registered cardiac sonographers. We utilize a team approach that facilitates optimal image acquisition, prompt interpretation, uniformity and timely reporting of results.

Our imaging cardiologists and echo techs are an experienced team, unified to meet the unique, rapid response cardiac imaging needs of donor hearts.

CardioRad's unique team approach to on-call donor heart cardiac imaging reduces subjectivity and provides fast, accurate results which are based on uniform, consistent selection criteria. CardioRad's imaging cardiologists directly communicate results and provide clinical support for your staff to ensure your success. Specific examples include the estimation of left ventricular dysfunction, LVEDD, wall thickness, degree of myocardial hypertrophy, cardiomyopathy and occult coronary artery disease. Particular attention is paid to wall motion abnormalities, aortic stenosis, significant mitral valve abnormalities, valvular dysfunction and anatomical congenital disorders.

CardioRad's imaging cardiologists are experienced with donor heart selection and the factors that lead to increased accuracy.

CardioRad eliminates multiple physician subjectivity and the varying technical capabilities and experience of cardiac sonographers that can occur across a donor network. We eliminate subjectivity of results which can occur when donors' echocardiograms are performed and interpreted without coordinated, consistent selection criteria.

Featured Client

OneLegacy is the non-profit organ and tissue recovery organization serving the seven-county greater Los Angeles, California area. OneLegacy's five offices serve 215 hospitals, 12 transplant centers and a diverse population of approximately 19 million.

Dr. Dandillaya and his team have partnered with OneLegacy since 2007 to provide on-call weekend and nighttime support for OneLegacy's donor hearts.

CardioRad provides full interpretations of pre-procurement echocardiograms, second-opinion tele-echocardiography as well as weekend and after-hours rapid response on-site cardiac imaging performed at OneLegacy's donor hospitals.
